Subject: RE: Request for Superfund FY19 Analytical Projections: ACTION NEEDED BY MAY 3RD
Attachments: Lane Plating, Sample request 5-27.pdf; Lane Plating Sample Request Form 5-13.pdf

The attached lab request forms were submitted to Myra Perez and Christy Warren on April 2. This is for lane Plating sampling that is scheduled to start on May 14. Filing in the analytical projections spreadsheet would be difficult as I would have to review the methods in the sampling plan to determine the collection method, analytical method, and detection limits. Please let me know if that is required in addition to the sample request forms.

Subject: FW: Request for Superfund FY19 Analytical Projections: ACTION NEEDED BY MAY 3RD
Importance: High

RPMs

Please submit your analytical projections for the remainder of the FY. The projection helps the Houston lab justify a request for additional CLP funds if necessary. The lab needs this information by **May 3rd**.

ACTION NEEDED

- 1) Fill out the projection form and send to the Houston lab contact and copy your supervisor, **OR**
- 2) If you have a lot of requests, fill out the attached OneDrive spreadsheet. We will forward this on May 3rd to the lab.

Thanks

John C Meyer

Subject: Request for Superfund FY19 Analytical Projections
Importance: High

Information needed by **May 3, 2019**

Hi John,

OSRTT's Analytical Services Branch (ASB) is requesting that the Regions provide projections for the remainder of FY19. ASB is seeking information on projected CLP analytical spending to determine if the Regions will use their allocation or if they will need additional funding. Currently, there are Regions that need added funding and ASB will ask "low use" Regions to donate some of their allocation. We have used 40% of our CLP allocation.

Please note, we analyze about 60% of the samples from Superfund sites at the Houston Lab and 40% are sent to the CLP. In the past two years we have exceeded our CLP allocation and funding was increased by ASB.

I am asking that your staff provide the projections of their analytical needs for **June through the end of the fiscal year** (Sept.).

A projection form for your staff to complete is attached. This projection form requires that an estimate be provided by month per site. Also attached is an excel spreadsheet in case you prefer to send all projections in one form for all sites. This information is needed by May 3rd.

I have copied Chris Villareal on this email. We need Site Assessment projections from him as well. Typically, we try to analyze all Site Assessment samples here at the Houston Lab, which may increase the number of remedial samples sent to the CLP.

Feel free to call or email me if you have any questions.

Thanks,

Marvelyn Humphrey
